

R WORKSHOP

NOV 18, 2016

[10:00 AM - 11:50 AM; Nursing Building – Room 276]

“Putting Everything Together for a Simple Statistical Analysis Report”

The goals of this workshop are:

- At the end of this workshop, each participant will read in a dataset, create new variables, run descriptive statistics and summarize their data
- At the end of this workshop, each participant will also have performed a simple statistical test or regression model, compiled the results and presented it within a final report format.
